What Support is needed for the Libby Asbestos OU7 (Troy) Sample Prep Lab?

A Laboratory-skilled team member for the Libby Asbestos Team that can devote approximately .25 to .50 FTE to the most important NPL site in the region and country.

Duties/Requirements envisioned:

1. Help determine and incorporate improved QA/QC into sample prep process
2. Help maintain and improve the facilities, protocols and equipment in Troy to improve production quantity and quality
3. Provide sample production oversight for ESAT contract staff in Troy occasionally
4. As needed, be the EPA face in Troy, interacting with other EPA staff, MDEQ Project Manager, locals and multiple contractors
5. Travel to Troy approx. 3-7 days per month (EPR will pay travel), no long stays needed.
6. Assist in Golden Lab Asbestos Analysis buildout efforts
7. Attend/participate in occasional Libby team staff meetings in Denver

Qualities we think are the best fit:

1. Experienced Laboratory staff (chemist background preferred) very familiar with lab QC and protocols
2. Very good communication skills, needs to interact at multiple levels
3. Someone who can work both proactively as well as reactively
4. Contract oversight experience preferred
5. A team player and problem solver
